

FLEXIBLE STAINLESS STEEL CABLE

Discover the versatility of ABUS aluminum locks crafted from durable Titalium™.

These compact and agile locks come equipped with a flexible stainless steel cable, replacing the traditional rigid shackle. This innovative design perfectly suits tight or clustered locking spots, such as intricate eyelets or adjacent locking points. Safeguard various items like fixtures, shed entrances, basement windows, or electrical enclosures. Simplify key management with the lock number conveniently labeled on the key, allowing for easy key duplication.

Technologies

- Same lock body as the compact safety padlock 72/30, but with a flexible cable instead of a shackle
- Cable made of stainless steel, PU-sheathed
- 3/16" cable diameter
- Can be combined in keying systems together with 72/40, 72/30 and 74/40 safety padlocks
- Key-retaining function: the key can only be removed when the padlock is properly locked
- Available in 8 different colors
- Available in 2 different cable lengths
- Available keyed different, guaranteed keyed different, keyed alike and as master key system

Use and application

- Can be used in situations where a rigid standard shackle reaches its limits
- Can be used in situations where two or more points have to be locked out in small spaces, e.g. in an electrical control cabinet

72/30CAB20 red

Variants

- 2 different cable lengths, 8 different colors
- 72/30CAB20 (7 7/8" cable)
- 72/30CAB40 (15 3/4" cable)
