

CombiLoop 205/200 black

Flexible, lightweight and long

An unsecured helmet on the bicycle handlebars or an unattended pram quickly become prey for thieves. With the 200 cm long CombiLoop 205 additional securing lock, objects can be reliably secured.

The steel cable is particularly lightweight at 180 grams and can therefore be taken anywhere. All you have to do to lock it is insert the locking bolt and you can protect several items from being taken away. The keyless operation is just as practical. The fuse cable can be opened using a four-digit number code. The code is freely selectable. This means that leisure equipment, bicycle accessories or prams are also well protected.

Technologies

- 5 mm thick steel cable
- Synthetic coating to prevent damage to the bicycle's paintwork
- Automatic locking at insertion of the locking bolt
- Individually settable code

Operation and use

- Additional security to secure accessories
- Ideal for securing leisure or sports gear as well as objects

Tips

- Cable locks stand out due to good flexibility and quite low weight
- The combination lock is very well suited for the use by several people
- Thanks to the flexible and adjustable loops, the total length of two meters can be ideally used and adapted to
