Switch Lockout E250

ABUS
Security Tech Germany

Universal switch lockout

The switch lockout can be used to block most standard wall switches.

Made from high-quality polycarbonate housing material, the wall switch lockout is made to be long-lasting and robust and can easily mounted on top of the control using existing plate screws. The wall switch lockout can easily be installed by removing the screws from the wall switch plate and use them to mount the device onto the plate.

Technologies

- High-grade polycarbonate: durable, robust and non-conductive
- Easy to install using existing screws
- Clear material so that you can easily see if switch is in on or off position
- 2 separate parts, without any fragile hinges
- For 1 safety padlock
